

Union City is Updating Its Vision for the Future!

Beginning in June of this year, the City of Union City initiated a two-year process to update the City’s General Plan, which was last updated in 2002. The General Plan is the City’s “blueprint” that guides decision making for land use, transportation, infrastructure, community design, environmental issues, and other important topics that impact the community. The General Plan is a long-range planning document that will look ahead to 2040. The update will not only bring policies and programs up to date, but also position Union City for the next 25 years.

The most important part of the General Plan Update process is public engagement. The public input we receive will help shape the vision, goals, and policies of the General Plan. Visit the General Plan website (www.uc2040.com) and join the email list to stay informed. Attend an upcoming community workshops, participate in the online townhall forum, and make your voice heard. Please invite your friends; we need your help to spread the word about the General Plan Update process.
